PROFILE

I have over 15 years experience in features, shorts, commercials, branded content, corporates and whatever else. Working for BBC, CNN, LEGO, MarlowFilm, TwoFour and large corporate production companies.

I use Premiere and After Effects. I'm a good storyteller and full of ideas; there's always another way to do it! I'm well used to turning gb's of footage into something that exceeds expectation.

I understand the whole production process from end to end, and am often involved throughout production for advice and ideas. Which is something I really enjoy.

I'm looking for new collaborators and creative challenges, and for projects that need some thought, research and style.
